

Off the beaten path of Plateu Putorana with Pavel Ageychenko — Detailed description

Trip Length: 10 Group: 4-9 Departure: Fixed Period: August

Trip overview

A lot of people call the Putorana plateau as the lost world of Siberia. The lack of roads, human settlements, short summer and severe winter attract more and more true nature lovers. Translated from the Evenki language, Plateau Putorana means "a land of lakes with steep shores", and translated from Yukaghir - "mountains without peaks." The bizarre mountains of the Putorana Plateau are located on the highest part of the Central Siberian Plateau. Snow on the tops begins to melt in July forming numerous lakes and waterfalls. Stepped slopes descend into the valleys, where powerful rivers and cleanest lakes create a "face" of the plateau...

We intend to conquer the Putorana plateau again and head for the most hidden corners to the very heart, far away from popular tourist routes. Our way lies along the rivers and lakes of the Putorana plateau on a comfortable and safe catamaran boat. Don't miss an opportunity to touch the pristine ancient lakes up to 100 million years old, and enjoy the bizarre landscapes. In the tour we do radial trekking to discover the most beautiful waterfalls from 10 to 47 m high! The highlight of our expedition is a visit of the Kureysky waterfall - the most powerful waterfall in Russia in the amount of water discharged per second (up to 1000 m3).

Full harmony and isolation from the modern world is guaranteed. Hiking, overnight in the tent under the starry sky, campfire songs, boat adventures and the riddles of wild world of Putorana await you. All you need is good physical condition and fighting spirit. An experienced team of guides, together with Pavel Ageichenko, founder of BaikalNature, will do everything to create a pleasant atmosphere. The tour is a kind of an expedition, so the route can be adjusted depending on the conditions.

Checklist & Equipment

You will need in Russia and Mongolia in winter:

- to protect yourself from the cold weather;
- to protect yourself from the wind;
- to protect your feet from moisture;
- to protect yourself from the sun's reflection from ice and snow.

Allow the system of "three layers":

- The first layer, called "second skin", determines the performance of the other two layers. It will transport sweat to the next layer and dry quickly to avoid cooling after exercise. Therefore forget the cotton retains moisture in the skin and choose underwear in synthetic fabrics.
- The second layer must keep the heat of the body as long as possible. Warm synthetic or mixed (wool or fleece turtleneck sweater) fabrics, that dry quickly, are preferable.
- The third layer should protect you against wind and moisture. Choose a jacket, long enough, 100% waterproof, preferably with hood.

We recommend you to pack all your stuff in two bags: a small backpack and a large travelling bag.

SMALL BACKPACK: will be useful for carrying your personal belongings during the day (camera, film, personal medication, bottled water, etc.) You will also use it as hand luggage during air travel for all your heavy (to lighten the travel bag in the luggage compartment), fragile (camera, etc.) and necessary (toilet bag, etc.) things.

BIG BACKPACK: must contain the rest of your stuff. It will be in the luggage compartment during the flight. You will bring it during some days of the trekking.
