

Expedition to the Shantar Islands — Detailed description

Trip Length: 13 Group: 10-20 Departure: Fixed Period: September

Trip overview

The Shantar islands are the unique place that might be considered as one of the wonders of Russia. Relatively few people have heard about this destination and even less visited it. This archipelago is destined for those who seek adventure and dare to test the forces in the ruthless waters of Okhotsk Sea.

We propose to you the real expedition to the islands that are distant from the civilization. There are only 4 men on the islands, they work at the weather station. However, the flora and fauna are really varied. You have possibility to see: thousands of birds, including the « landlord » of this territory – Steller's sea eagle, killer whale, whale, seal, bear, zibeline and others.

The nature and landscapes are really diverse: gentle banks, rocks, taiga, mountains, rivers and lakes – we will see everything that the nature allows to us.

Meet the nature. The pure nature that was waiting for you for millions of years...
